

PROTECTIVE COVER  
BECAUSE IT'S YOUR BODY

PROTECTIVE COVER  
BECAUSE IT'S YOUR BODY

## SLEEP BETTER WITH PROTECTIVE COVER – “BECAUSE IT’S YOUR BODY”

We set up our company to develop bedding products that offer a better quality of life for adults and children suffering from **itching and skin conditions, such as eczema and neurodermatitis.**

## EXPERIENCE THE POWER OF THE SEA WHILE SLEEPING!

**Protective Cover is a unique cover that protects your skin during the night.** In cooperation with Smartfiber AG and their patented functional fibers SMARTCEL SENSITIVE and SEACELL, we have set ourselves the goal of bringing high-quality bedding to the market that helps people with sensitive skin or skin diseases.

Our products are made in Austria, with a focus on **sustainability and environmental friendliness.** We use raw biogenic materials that are environmentally friendly, resource-saving and biodegradable, while having an anti-inflammatory, antibacterial and anti-itching effect.

## BRING THE POWER OF THE SEA INTO YOUR BEDROOM!

Our products are suitable for anyone who needs them. See the benefits of the Protective Cover for your skin for yourself.

### ADVANTAGES:

- Pure natural materials
  - Sustainable
  - Biodegradable
    - Vegan
- Good for your health
  - Made in Austria

## ABOUT THE PROTECTIVE COVER

We were looking for bedding that was **anti-inflammatory, anti-bacterial and itch-alleviating, which also protects and cares for the skin.** None of the products on the market met our needs, so we decided to take bedding to the next level.

We developed the PROTECTIVE COVER – „Because It’s Your Body” range of products. **This bedding is for anyone who suffers from itching or skin irritation, and for anyone who wants to use sleep as a skin regeneration treatment.**

Sleep is important for regenerating the body and is considered one of the most important life processes for humans and animals. But for many people with sensitive skin, sleep can be disturbed by eczema or itching. This often leads to exhaustion, tiredness during the day and sleeplessness at night.

We developed PROTECTIVE COVER to **help people heal their skin and give them a new quality of life.**

The skin is the largest organ in the human body. First and foremost, it is a barrier to very efficiently protect our organism from a dangerous environment.

Compared to most bedding on the market, the focus was to achieve clinically proven results. PROTECTIVE COVER – bedding that helps to regenerate the “protective cover of the skin”.

## EXPERIENCE THE ENERGY BOOST FROM THE SEA!

British doctor Richard Russel caused a sensation in 1750 when he used algae to alleviate skin diseases. Marine brown algae is a veritable multi-talent and a fuel source for your health.

These algae are rich in vitamins, minerals, trace elements and amino acids such as selenium, iodine, zinc and omega 3 fatty acids. They accelerate the breakdown of toxins and fatty substances and have an **anti-inflammatory effect**.

Let the versatile benefits of seaweed revitalize, purify, soothe and tone you. Experience the difference for your health.

## SEACELL – HEALTH, SUSTAINABILITY AND AN ECOLOGICALLY-CONSCIOUS LIFESTYLE.

A fiber that offers health benefits and skin-friendly properties is in high demand these days. The SEACELL fiber contains the **healing active ingredients of seaweed and enables an active exchange of substances between the fiber and skin**, creating a lasting effect on the user.

**The advantage:** algae store a large amount of active substances from the sea such as amino acids, iodine, mineral salts, trace elements and vitamins. In addition, algae can alleviate skin diseases such as neurodermatitis or psoriasis and accelerate the healing process of the skin. They also protect against premature skin ageing, which is triggered by free radicals.

### SEACELL'S ADVANTAGES:

- Nourishing and revitalizing
- Natural and environmentally friendly
- Rich in antioxidants and vitamins
  - Additives do not wash out
- Protection against free radicals

# SMARTCEL

## A NATURAL COMPOUND FOR HEALTHIER SKIN – SMARTCEL SENSITIVE

SMARTCEL SENSITIVE is produced in a **sustainable way** – thanks to a closed-loop process that does not release any chemicals. The cellulose fiber is made from a natural raw material that is environmentally friendly and 100% biodegradable. This sustainable production method has even been awarded the European Business Awards for the Environment.

**SMARTCEL SENSITIVE is not only sustainable; it's also effective:** The fiber is rich in vital zinc oxide, which protects and cares for the skin. People with sensitive skin or skin diseases such as **eczema, itching or neurodermatitis**, in particular, benefit from the protective properties of SMARTCEL SENSITIVE.

The SMARTCEL SENSITIVE fiber **with zinc oxide** was developed in cooperation with the Thuringian Institute for Textile and Plastics Research (TITK).

**Zinc oxide is a natural element that is antibacterial and also has positive effects on the skin.** It is particularly protective and offers anti-inflammatory and odor-reducing properties. This high-tech fiber combines caring and regenerating effects with hygienic properties.

Using SMARTCEL SENSITIVE supports our skin's function as a protective shield of the body.

**Independent institutes**, such as the Hohenstein Institute and the Friedrich Schiller University of Dermatology in Jena, **have confirmed the effectiveness of SMARTCEL SENSITIVE.** See the positive effects for yourself and take a look at the certificates and studies on our website!

### SMARTCEL SENSITIVE'S ADVANTAGES:

- **Anti-inflammatory**
  - **Anti-bacterial**
  - **UV protection**
  - **Skin-friendly**
  - **Odor-inhibiting**
- **Environmentally-friendly**
  - **Fully biodegradable**
- **Additives do not wash out**

### WHY IS IT CALLED “PROTECTIVE COVER – BECAUSE IT’S YOUR BODY”

A healthy body is our most important asset. And our skin plays a major role here too! It is a barrier that protects us from hazardous influences. That’s why we asked ourselves this: **if the skin protects our body, who protects the skin?**

We spend a third of our lives in bed, so why not use this time to protect and care for our skin?

PROTECTIVE COVER bedding is more than just comfortable – it’s a protective cover for the whole night. All our products are **100% biodegradable** and combine the natural powers of SEACELL and SMARTCEL SENSITIVE. So not only do you feel safe, you also wake up feeling refreshed.

While we sleep, we lose up to half a liter of moisture in the form of water vapor. Our duvets can absorb up to 50% more moisture than cotton, so your skin stays dry, even when you sweat excessively.

The combination of viscose and lyocell is very breathable and cooling, which is especially important to avoid heat build-up. Our bedding is developed from pure natural fabrics and contains no polyester or microfiber, so you can enjoy a good night’s sleep.

Experience the difference with PROTECTIVE COVER bedding – better sleep for your body and the environment!

## THE BEST SOLUTION FOR SENSITIVE BABY SKIN!

When developing our children's bedding, we focused on the **special needs of children** with sensitive skin and skin irritations such as neurodermatitis.

The skin of babies and small children is up to five times thinner than the skin of adults. Their protective film is poorly developed and they release water more quickly. This is why they tend to have dry skin.

Our children's bedding provides sensitive skin with the positive properties of SEACELL and SMARTCEL SENSITIVE all night long. Through the natural moisture of the skin, the effect of the health-promoting fibers is released and absorbed through the skin during sleep. Irritable baby skin is soothed, vitalized and supplied with valuable vitamins.
